## Experience

---

### Di Santinni

*Systems Analyst*

📅 03/2025 – present  
📍 Remote

- Responsible for the maintenance and evolution of the internal company system, ensuring efficient operation and alignment with user demands.
- Oracle database management focusing on performance, SQL query development, report extraction, and cross-system integration.
- Development of middleware solutions using Python and Node.js for XML parsing and external API integration, converting file inputs into API requests to facilitate connectivity and maintain synchronization between enterprise products and external systems.

### Viva Rio

*Information Assistant I*

📅 01/2024 – 03/2025 (~ 1 yr 2 mos)  
📍 On-site

- Developed a desktop WhatsApp bot using Node.js with Nest.js, Electron.js, TypeScript, and TailwindCSS.
- Development, customization, and deployment of a Moodle LMS platform on HostGator using PHP and SCSS.
- Creation of dynamic dashboards with PowerBI, utilizing Excel VBA and Python.

### Di Santinni

*IT Intern*

📅 02/2022 – 01/2024 (~ 1 yr 11 mos)  
📍 Remote

- Service automation using Python and pyautogui.
- Spreadsheet control and management using Excel and Google Sheets.

### Global Hitss

*Apprentice - Computer Operator*

📅 10/2020 – 02/2022 (~ 1 yr 3 mos)  
📍 Remote

- Process automation with Python web scraping.
- Spreadsheet management using Excel.
- Management of outsourced service documentation on the intranet system.

## Projects

---

**Match Movie** — *React Native, TypeScript, EXPO, Node.js, Nest.js, PostgreSQL, Docker*

February 2025

- Development of a tinder-like application (Capstone Project) to facilitate movie choices for user groups.
- Integration of external APIs such as TheMovieDB, OpenCage Geocoding, and Ingresso.com; utilized technologies like Context API, Expo Secure Store, and React Navigation.
- Redirection to nearby movie theaters based on user location.
- UI/UX standard screens, responsive and engaging interface, focusing on user experience.

**HorseCare** — *PHP, JavaScript, HTML, CSS, MySQL*

December 2023

- Development of a horse boarding management application.
- User and employee registration with login authentication.

**Commodities** — *Python, Streamlit, CSS*

June 2023

- Development of a Streamlit application for commodity and asset variance analysis.
- Developed in partnership with **OBIinvest** (Brazilian Investment Olympiad).
- Creation of charts and tables using matplotlib and pandas.

## Education

---

### CEFET

*B.Sc. in Information Systems*

📅 02/2021 – 02/2025 (~ 4 years)  
📍 On-site

## Skills

---
